1. CHOOSING A TEST CARD..... 3

2. CARRYING OUT A TEST PAYMENT..... 8

1. CHOOSING A TEST CARD

The payment gateway provides you with credit card numbers for making payment in test mode.

Different payment cases can be **simulated** using the test card numbers indicated in the tables below.

The merchant can test these payment cases in:

- payment by form,
- payment by Web Services,
- or MOTO payment.

To allow merchants to test the risk configuration defined on their store, test cards country **DINERS, VISA et MASTERCARD** corresponds to the company country, except for the following cards, for which country is GREENLAND (GRL):

- DINERS: **36000100000106**
- VISA: **4970110000001029**
- MASTERCARD: **5100010000000114**
- Cards **CB, e-Carte Bleue, Mastercard, Maestro, Visa, Visa Electron**

Card number	Test card checked
CB/Mastercard	
5100010000000114	Payment accepted with 3DS2 authentication without interaction and with fingerprinting

58882990000000306	Payment by Cofinoga rejected due to failed 3-D Secure authentication, the buyer did not manage to authenticate him/herself

- **JCB** card type

Card number	Test card checked
3528000000000007	Payment accepted
3528000000000015	Payment refused
2528000000000008	Payment refused

- **DISCOVER** card type

Card number	Test card checked
6011000000000053	Payment accepted
6011000000000046	Payment declined, do not honor

Card number	Test card checked
6011000100000045	Payment with authentication, without interaction and without fingerprinting
6011000100000102	Payment with authentication, without interaction and with fingerprinting
6011000100000029	Payment with authentication, challenge and without fingerprinting
6011000100000110	Payment with authentication, with challenge and fingerprinting
6011000100000144	Payment with authentication, with fingerprinting and timeout
6011000100000136	Payment with authentication, with challenge and fingerprinting timeout
6011000100000060	Payment with authentication, with challenge timeout

- **DINERS** cards type

Card number	Test card checked
360000000000008	Payment accepted
360000000000057	Payment declined, do not honor

3DS2 ProtectBuy

Card number	Test card checked
36000100000049	Payment with authentication, without interaction and without fingerprinting
36000100000106	Payment with authentication, without interaction and with fingerprinting. Card country: GRL.
36000100000023	Payment with authentication, challenge and without fingerprinting
36000100000130	Payment with authentication, with challenge and fingerprinting
36000100000114	Payment with authentication, with fingerprinting and timeout
36000100000148	Payment with authentication, with challenge and fingerprinting timeout
36000100000064	Payment with authentication, with challenge timeout

The choice of the expiration date and cryptogram remains free (Ex: expiration date = 04/25 and CVV =123).

*The test transactions can be viewed by all duly authorized users of the Merchant Back Office in **Management > TEST transactions** menu.*

The results of the tests below are conditioned by enrollment status of your MID. As long as you don't receive the email notifying you of the activation of your guarantee (3D Secure, Safekey, ProtectBuy or JSecure), the test payments will be made without warranty.

2. CARRYING OUT A TEST PAYMENT

The user can carry out a payment by **form**, a **MOTO payment** or a payment via **Web Services**.

Carrying out a test payment by form

1. Display the payment method selection page.

To display the payment method selection page, the user can:

- configure his payment page in test mode,
- or create a payment order by e-mail in the Merchant Back Office.

2. Click on the payment method to be tested

The bank details capture page appears.

The screenshot shows the Systempay payment interface. On the left, there's a form with fields for 'Transaction Identifier', 'Shop ID', and 'Amount' (displayed as 12.36 EUR). Below these fields is a security notice. On the right, under the heading 'Information for the payment', there are input fields for 'Card number', 'Expiry date' (with month and year dropdowns), and 'Security code'. A 'SUBMIT' button is located below these fields. At the bottom right, there are logos for VISA, VISA SECURE, and Mastercard ID Check.

Figure 1: Entering payment method details

A list of available card numbers is displayed below. Example:

USE TEST MODE

*Click on one of the test numbers listed **below** to automatically populate the fields in the form.*

Each test number corresponds to a result of an expected payment.

Hide test cards CB/Mastercard ^

- [5100 0100 0000 0114](#) - Payment accepted with 3DS2 authentication without buyer interaction and with fingerprinting
- [5100 0100 0000 0106](#) - Payment accepted with 3DS2 authentication with challenge and fingerprinting
- [5100 0100 0000 1054](#) - Payment accepted with 3DS2 authentication with challenge and timeout on fingerprinting
- [5100 0100 0000 0056](#) - Payment with 3DS2 authentication with timeout on the challenge
- [5970 1003 0000 0042](#) - Payment accepted, buyer not enrolled for 3DS
- [5970 1003 0000 0067](#) - Payment accepted, payment guarantee = NO

- [5970 1003 0000 0075](#) - Payment declined due to failed 3DS2 authentication, the buyer did not manage to authenticate him/herself

Show test cards CB/Visa v

Show test cards CB/Maestro v

Show test cards CB/Visa Electron v

3. Click on the appropriate card number

The fields of the bank details are automatically filled in.

4. To finalize the payment, click on **Validate**.

The payment result page appears.

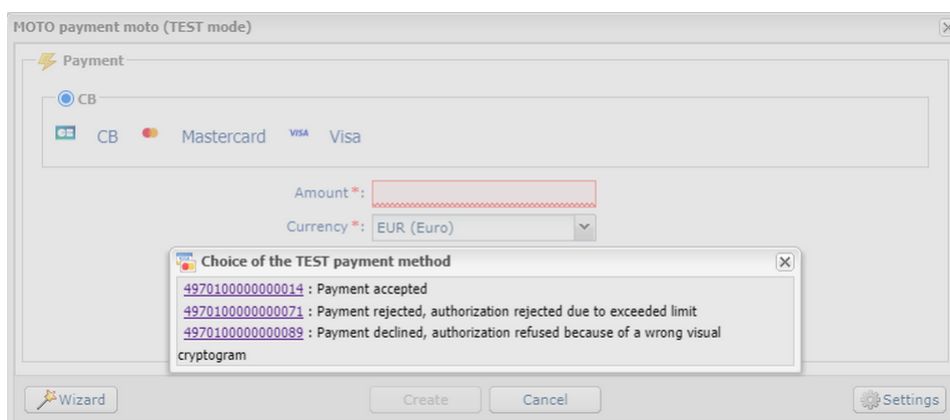

If the payment has been successfully completed, a page with the transaction summary will appear with possibility to download receipt in PDF format.

In case the transaction fails, a message appears. The buyer is informed of the rejection of the payment request.

Carrying out a MOTO payment in test mode

1. Choose the MOTO payment in the Merchant Back Office.
2. Activate the payment method of the buyer.
3. Enter the transaction amount.
4. Select the transaction currency.
5. Click on Test payment method.

The **Choice of Test payment method** page appears.

6. Click on the appropriate card number

The fields of the bank details are automatically filled in.

7. Click the **Create button to validate the transaction.**

If successful, the detail of the transaction is displayed. In case the transaction fails, the input fields remain filled in order to facilitate any new attempts.
